

WORKING TEMPERATURE
UPPER LIMIT: 250°F / 120°C

ADDED VALUE

- High-visibility systems protection
- Wear indication & line identification
- Expandable to install over fittings
- Increase uptime and efficiency

MATERIAL COMPOSITION

- Solution-dyed Nylon 6
- Tightly braided protective sleeve
- Various colors available
- Excellent wear and abrasion protection

VERSATILE PROTECTION:

- Abrasion & Wear resistance
- Cut-through protection
- UV-Resistant polymer
- Lines remain flexible
- Print system information
- Bundling solution

HIGH VISIBILITY:

- Promote operator awareness
- Color-code different lines
- Provide line identification
- Wear indication
- Promote brand colors

APPLICATIONS

- Protect systems from premature wear and increase uptime
- Bold colors allow for high-visibility, color-coded line identification
- Bright sleeving will contrast with black hydraulic hoses, providing simple wear indication
- Mining, equipment, forestry, agriculture, trucking, automotive applications

TUFFTEX B BRAIDED ABRASION SLEEVE

- Brightly colored Nylon 6 braided abrasion sleeving developed to address industry's need for colored abrasion sleeving
- Bold coloring provides for line identification, visibility, and wear indication
- Braided construction provides 100% system protection and is expandable, allowing for installation over hose assemblies with fittings
- Provides excellent wear and abrasion protection and is resistant to UV light, common industrial fluids, and environmental exposure

Product Description

Atlantex's brightly-colored Tufftex Braided Abrasion Sleeve (Tufftex B) provides excellent wear and abrasion protection with high visibility and great colorfastness. Tufftex B's braided construction provides 100% coverage in a lightweight, flexible, and expandable protective sleeve. Nylon provides resistance to UV, common industrial chemicals, and weathering. Vibrant colored sleeve provides wear indication.

Availability

- Available in Safety Orange, Yellow, Red, Blue, Green, and many other colors upon request
- Bulk lengths available for scrap reduction

Material Resistivity

- Moderate temperatures
- Oil resistance
- Water resistance
- Hydraulic fluid resistance
- Fuel resistance
- Wear resistance
- UV resistance
- Environmental exposure
