

PYROTHERM THERMAL BOOTS

HIGH PERFORMANCE IGNITION PROTECTION

WORKING TEMPERATURE
CONTINUOUS: 1200°F / 650°C
MINIMUM: -94°F / -70°C
SATURANT: 400°F / 205°C

ACCREDITATIONS

- REACh & RoHS Compliant
- Made in USA

MATERIAL COMPOSITION

- Continuous filament E-Glass fiber
- Polymer saturant applied
- Double-wall construction

AVAILABILITY

- 6" length standard
- Supplied in standard boxes
- Stock product for fast shipping
- Available in natural tan and 6 additional bold colors

ADDED VALUE

- Optional retention ring
- Custom lengths available

PRODUCT DESCRIPTION

Pyrotherm Thermal Boots are manufactured with a double-wall braided fiberglass construction for long-lasting ignition protection in high-temperature automotive applications. Available in a range of bold colors, various lengths, and with optional retention rings to suit any type of vehicle.

Pyrotherm Boots are easily installed on virtually any make and model. The durable saturated fiberglass material will not burn or support combustion, and is highly resistant to fuels, oils, lubricants, solvents, and other automotive fluids.
